ABSTRACT EFFECTS

The beauty of nature as she transforms in a minute and evolves over passages of time.
"ABSTRACT EFFECTS" shows the transformations of designs which highlight such adorable beauty
and the uniqueness of mother nature.

SUPER STRATAFLEX

Highly durable films suitable for exterior applications with weather exposure

Extreme Durability in Exterior Environments

The film surface is coated with a high protective, durable UV protection film, preventing deterioration of the STRATAFLEX printed layers by sunlight and weather exposure. Consult your authorized STRATAFLEX installation partner prior to installation.

Stain Chemical Resistance

The top protective layer of special film contains a special compound to provide additional resistance to exposure to oils, stains and chemicals.

Ultraviolet absorption film laminated on top

STRATAFLEX WIPEBOARD FILM

STRATAFLEX WIPEBOARD transforms most interior surfaces into writable and projectable communication surfaces

TW-1000

Convenient to Use

Easy to write on, highly legible and easy to clean using all standard STRATAFLEX WIPEBOARD markers and accessories.

Projected Images are Bright and Sharp

The special surface finish of STRATAFLEX WIPEBOARD offers a smooth, consistent image when projected upon, improving image sharpness and reducing eye fatigue.

Highly Effective Finish

STRATAFLEX WIPEBOARD is comfortable to corners, allowing for unusual applications around columns or bulkheads.

※ limited to TW-1000

Projected Image Comparison

TW1000 diffuses the reflected glare of a light source and improves the visibility of the projected texts

PRODUCT COMPARISON

	Writable	Projectable	Installs Around Corners	Installs Along Curved Surfaces
TW-1000	○*	○	○	○
TW-2000	⊗	×	×	○

※ For additional usage information, please refer to this booklet inside the front cover page 41.

DOOR COLLECTION

Specialised refinishing film for exterior door projects

Extreme Durability in Exterior Environments

The film surface is coated with a high protective, durable UV protection film, preventing deterioration of the STRATAFLEX printed layers by sunlight and weather exposure. Consult your authorized STRATAFLEX Dealer/Installer prior to installation.

Intended Application

STRATAFLEX DOOR COLLECTION is a revolutionary product, engineered as a thicker, more durable version of traditional STRATAFLEX that is specifically intended for the demands of the exterior environment and sized to allow refinishing of door faces with minimal waste and maximum efficiency.

Advantages of STRATAFLEX DOOR COLLECTION

STRATAFLEX DOOR COLLECTION is produced in a special, narrower 1,000mm width intended specifically for the door refinishing market. This narrower size allows for less waste and efficient installation.

*All data is for reference only and cannot be guaranteed.

1. COMPOSITION & ROLL SIZE

- Composition : Poly Vinyl Chloride (PVC)
- Standard Roll Size : 1.22m x 50m (some designs are in 30 or 40m rolls).
Cut length is available on request.

2. LOWEST TEMPERATURE FOR INSTALLATION

12 °C

3. IDEAL TEMPERATURE FOR INSTALLATION

20 - 25 °C

4. STORAGE CONDITIONS

Store the product in good condition, below 38 °C, avoid direct sunlight and high humidity. Use within 1 year of purchase.

5. DIMENSION STABILITY TEST

(Test method) : 150 x 150mm of STRATAFLEX was applied to the centre of a 200 x 200mm aluminium panel. One crossing surface cut was made in centre of the finish. After 2 days at 65 °C, the maximum gap in the cut was measured.

(Test result) : Not greater than 0.3mm

6. THERMAL DURABILITY TEST

(Test method) : STRATAFLEX was applied to an aluminium panel. It was kept for 12 days and exposed to various temperatures.

(Test result) : No peeling or colour change occurred between - 30 °C to + 65 °C

7. SUNSHINE CARBON ARK LIGHT TEST

(Test method) : 250 hours lighting of sunshine, using Carbon Ark Light testing machine at 63 °C of black panel temperatures.

(Test result) : No change

8. ABRASION TEST

(Test method) : Final abrasion point by Taber testing machine (wheel : CS-17, 1kg weight)

(Test result) : Greater than 7000 cycles

9. HIGH TEMPERATURE DURABILITY TEST

(Test method) : STRATAFLEX was applied to an aluminium panel and kept for 28 days at 65 °C

(Test result) : No change in adhesion

10. HIGH HUMIDITY DURABILITY TEST

(Test method) : STRATAFLEX was applied to an aluminium panel and kept for 28 days at 40 °C RH 90%.

(Test result) : No change in adhesion

11. LOW TEMPERATURE IMPACT TEST

(Test method) : Du-Pont impact test (0 °C, 100g, 100mm, 1/2 inch diameter)

(Test result) : No change

12. TEST FOR ANTI-BACTERIAL

(Test method) : JISZ2801 The Bacteria were cultivated at 35 °C and over 90% RH for 24hours

(Test result) :

Tested Bacteria	16 hours after soaking in room temperature water	10 hours after xenon weathering test
Colon Bacillus	Antibacterial Activity Value Greater than 2.0	
Staphylococcus Aureus		

*Antibacterial Activity Value (R) = Ut- At ≥2.0

Ut: Average number of living bacteria (1orf) on standard STRATAFLEX after 24 hours

At: Average number of living bacteria (1of) on Anti-Bacterial STRATAFLEX after 24 hours

13. TEST FOR ANTI-MOULD

[Test result] :

Items for test	Grade			
	10 days later	14 days later	21 days later	28 days later
TA-4701 to TA-4803	0	0	0	0
Other products	2	2	3	3

*Grade : 0 - 4 (It shows the condition of mould's growth)

0 : Not found

1 : Under 10% of surface area

2 : 10 - 30% of surface area

3 : 31 - 60% of surface area

4 : 61 - 100% of surface area

* Test method : ASTM-G21, at 28 °C ± 2 °C and over 95% RH

* Tested by Tokyo Metropolitan Industrial Technology Research Institute

14. ∞PVC

Please note that under Japanese law, all PVC items must carry the ∞ PVC logo which is printed on the reverse of the STRATAFLEX products.

This may become visible if adhered to translucent substrates.

*All data is for reference only and cannot be guaranteed.

15. SOLVENT / CHEMICAL RESISTANCE TEST

[Test method] : Test chemicals were applied to the surface of STRATAFLEX and left to stand for 6 hours. They were then rinsed with water and left to air dry 24 hours.

GENERAL INSTALLATION INFORMATION

STRATAFLEX self-adhesive laminate film is easy to install on non-absorbent, hard, smooth surfaces. We want everyone who uses STRATAFLEX to be able to apply it successfully and therefore recommend that you follow the approved hanging instructions. For detailed hanging instructions contact Customer Services or visit www.muraspec.com, and select 'technical'. Additionally, full Hanging Instructions are supplied with every order.

BEFORE YOU START :

The key to successfully installing STRATAFLEX is good preparation of your working environment; solid, smooth working surfaces and having the right tools and equipment to hand for each type of job.

GENERAL PREPARATIONS :

- Check materials are as ordered and as specified and are free from damage.
- Ensure all material is from the same batch and that you have sufficient material to complete the work.
- We recommend that the floor adjacent to the work area is covered using a clean protective sheet and that the working environment is clean and dust free.
- Make sure that there is good lighting and good ventilation.
- The conditions must not be excessively hot or cold as this could affect the application process.
- Due to the nature of the design, some metallics under certain lighting conditions can display shading at the joints, which is a characteristic of the product.
- Care must be taken when applying and repositioning the product onto itself as contact with the adhesive and the face of certain designs may affect its appearance.

*Please be aware that different products within the STRATAFLEX range have varying hanging instructions. Below are 2 areas of particular note.

*Care should be taken with the waxed release paper after use due to potential slipping hazard.

*Due to the nature of the manufacturing process and the characteristics of self-adhesive vinyls it is not possible to achieve an exact pattern match when any design is installed, however if care is taken during installation all designs we believe will give a very acceptable finish.

1. INSTALLATION FOR A CURVED SHAPE SURFACE

STRATAFLEX can be applied on certain curved shape surfaces by using heat from hair dryer or heat gun with a low setting.

APPLICATION

- Apply heat to the area of STRATAFLEX that is to be wrapped until it becomes flexible.
- Gently stretch the STRATAFLEX onto the curved area, taking care not to focus the heat on the same area for too long as this could lead to over stretching.
- After covering the curved area with STRATAFLEX, cut off the excess edges on the underside. To complete the application, you should then apply a strip of STRATAFLEX to the underside, overlapping the cut edge. You should enhance the edge to be overlapped before fixing.

IMPORTANT NOTICE

- Some items are not suitable for curved shape surface application. Check the product details for each item before selection.
- Excess heat and stretching can cause colour change or unevenness on the surface.

2. INSTALLATION OF 'SUPER STRATAFLEX' FOR EXTERIOR USE

- Use a waterproof sealant to prevent water from penetrating. The recommended substrate is steel or similar finish.
- Do not apply onto a ceramic surface, as the long-term adhesion cannot be guaranteed.
- Apply directly on glass after cleaning. Do not apply on glass exposed to direct sunlight, as this may result in movement.

USING 'STRATAFLEX ADHESION ENHANCER'

'STRATAFLEX ADHESION ENHANCER' is designed to increase the bond strength in certain situations. Enhancer should be used where extra adhesion is required for such as: door edges; overlapped areas; filled areas and where heat is used to form a shape and where an open cut edge is to be left.

We suggest to apply the PVC after the substrates are bent and use a hair dryer or similar heat source to warm the PVC film when stretching it.

1. Apply primer to corners and 3D surface

2. Cut 100-150mm bigger than the actual size

3. Apply PVC to the flat surface first

4. Apply PVC to the curved surface

When you apply the PVC to the corner / 3D surface, you need to warm the PVC using a hair dryer to soften it. Once the PVC becomes soft enough, stretch gently toward you and apply to the curved surface. Press the PVC with a squeegee to avoid bubbles and wrinkles.

5. Remove unnecessary film by cutting

6. Where the PVC has been warmed and stretched, to prevent any possibility for this to peel off due to any shrinking, it is recommended to overlap another piece of PVC to protect it.

This gives complete cover by the PVC
