Product Overview | 2023

STRATAFLEX^{vol.11}

2021 - 2023

Flexible PVC decorative film with a self-adhesive layer on the back side.

STRATAFLEX Selling Points

Cost Saving

STRATAFLEX is much more cost efficient compared to real wood or stone, with the same look and texture available at a fraction of the price.

Time Saving

It's as simple as sticking it on top of an existing surface, so the time needed for renovations and the downtime is heavily reduced.

Sustainability

STRATAFLEX limits waste and enables repurposing of materials. The use of STRATAFLEX surface materials allows surfaces, including doors, to be refinished with a long-lasting durable and beautiful surface.

RW PREMIUM WOOD

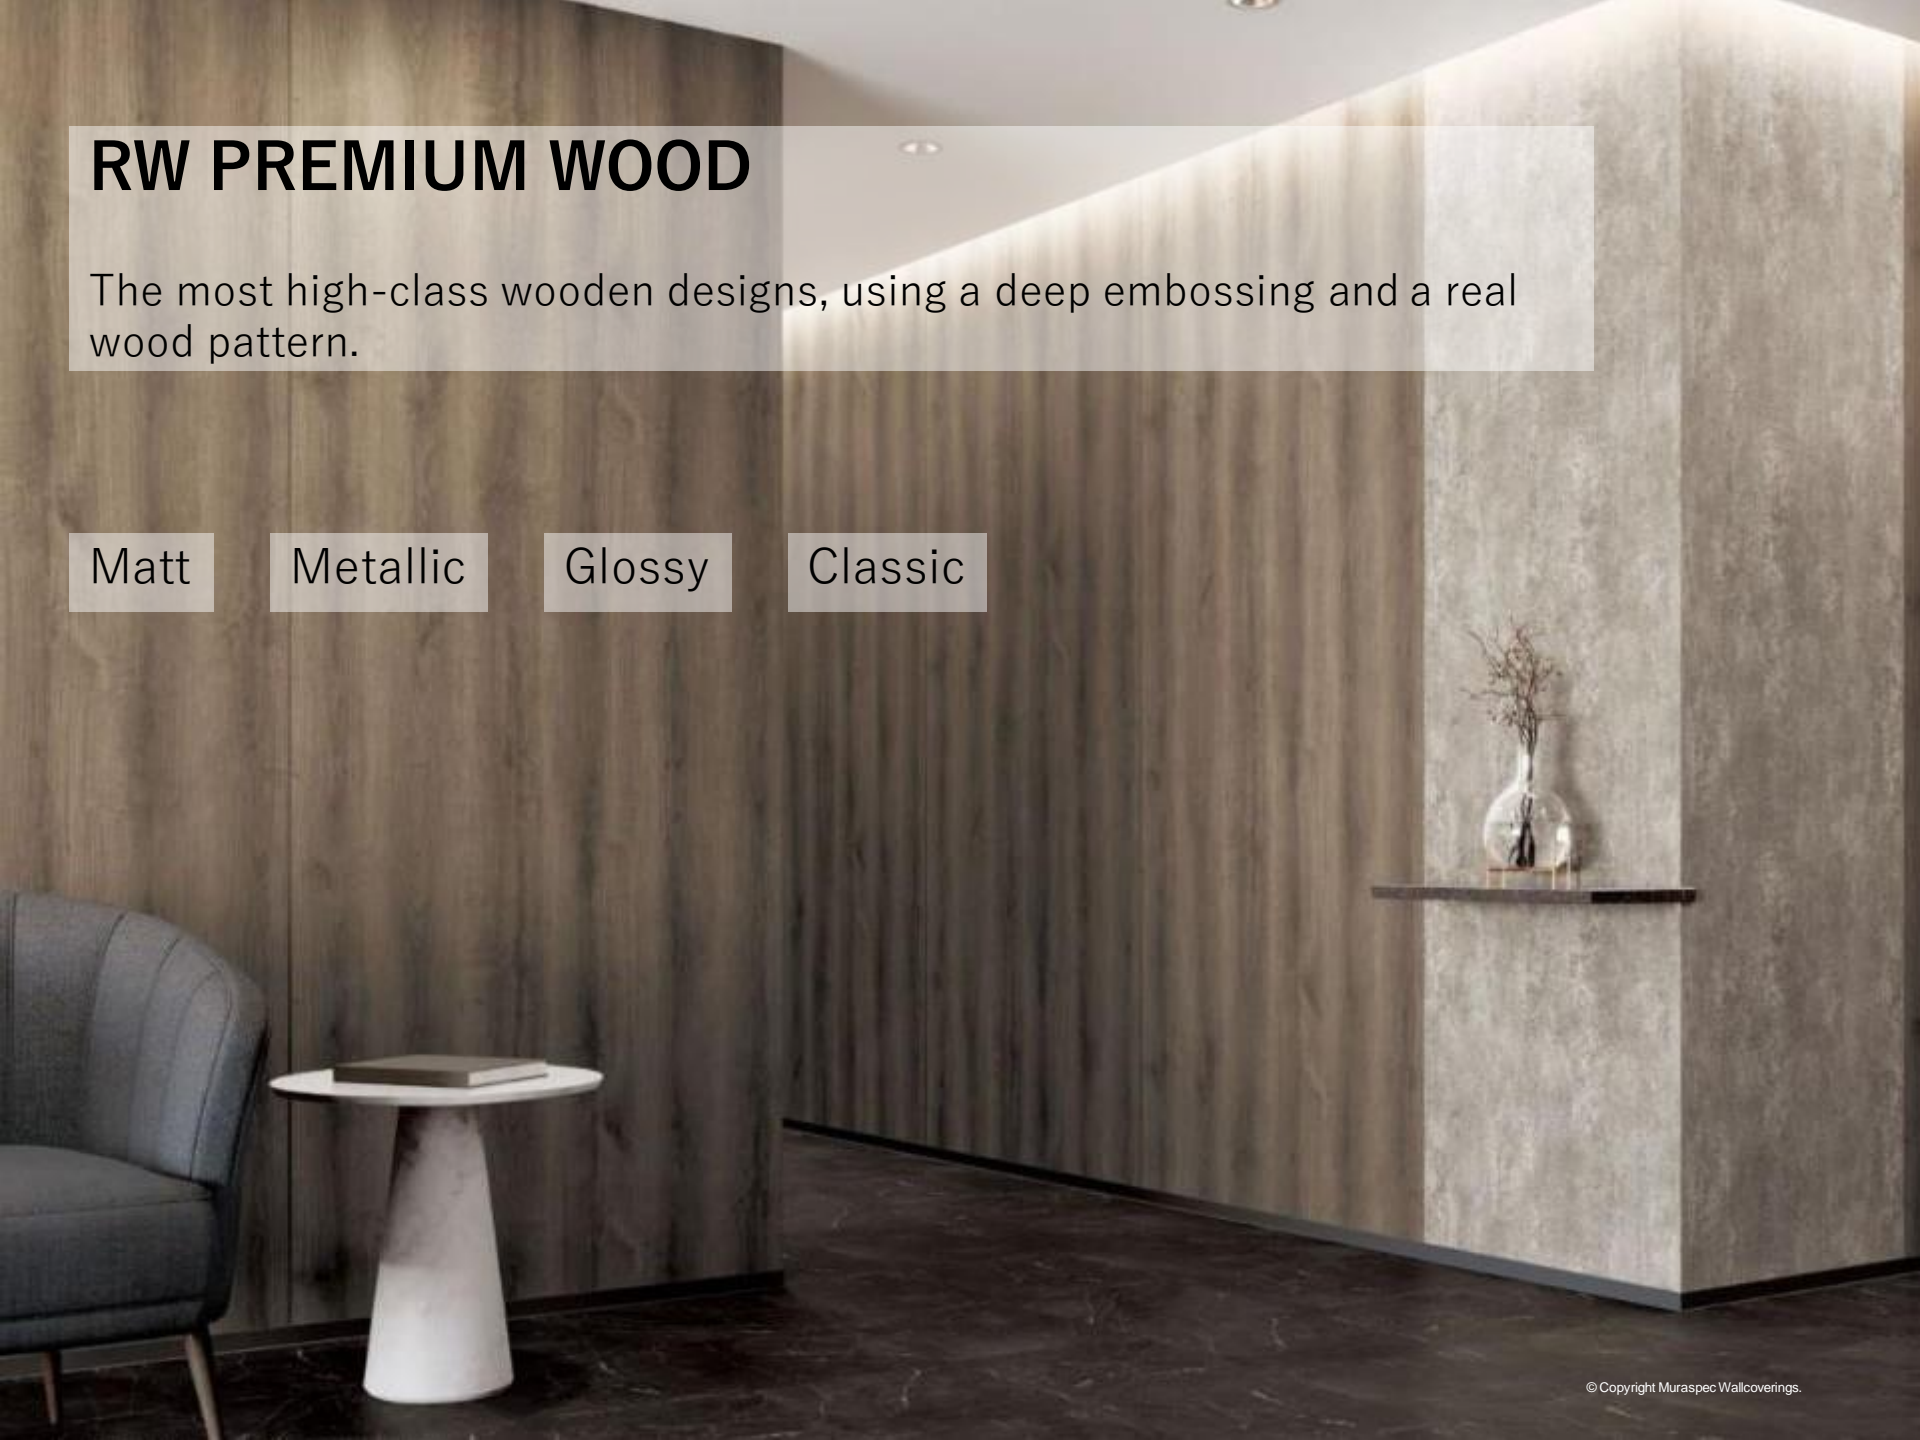

The most high-class wooden designs, using a deep embossing and a real wood pattern.

Matt

Metallic

Glossy

Classic

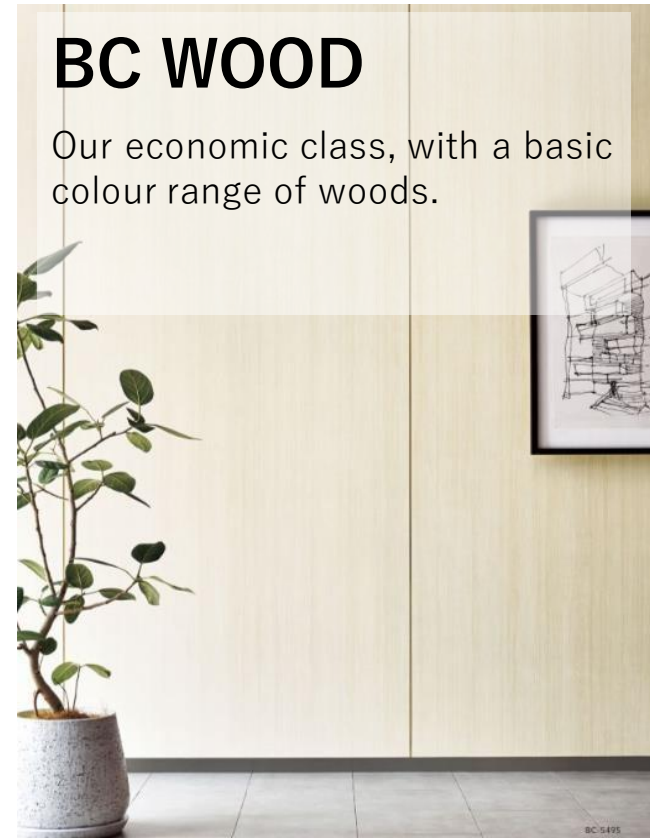

TC WOOD

The standard class of wooden designs. A wide range of colours and wooden designs are available in this series.

BC WOOD

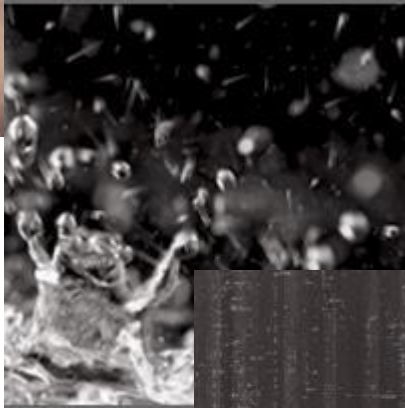

Our economic class, with a basic colour range of woods.

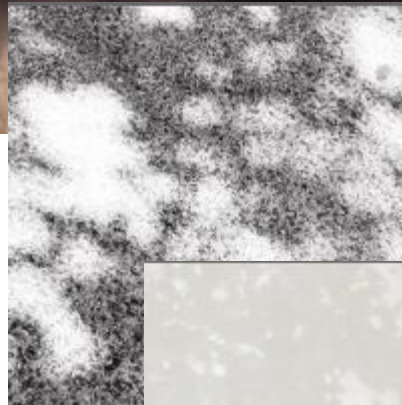

ABSTRACT OF NATURE

Designs inspired by natural beauty.

We have concept images for each design,
allowing us to bring the essence of nature into any space.

STRATAFLEX Specialties

Door Collection

Extreme durability with high protective UV film coated.

Narrower 100cm width (Standard STRATAFLEX 122cm) to minimise waste and maximise efficiency to refinish doors.

Carbon Arc test for Door Collection

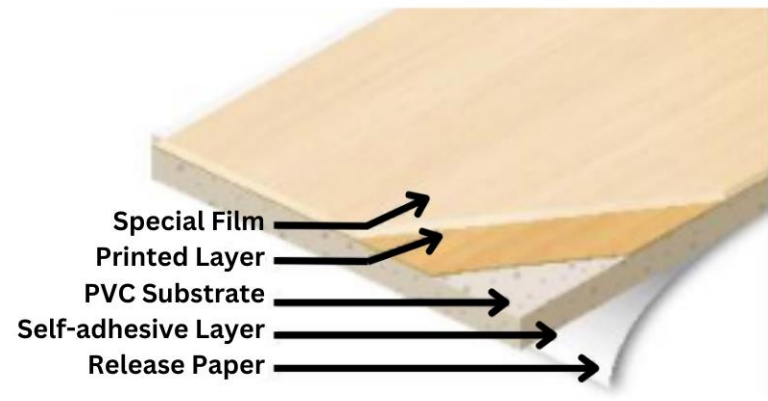

STRATAFLEX Specialties

Anti-Bacterial & Anti-Mould Treatment

Great for use in bathrooms and areas with high water use or humidity.

These specific designs are most suitable for the renovation of areas with high water usage, such as bathrooms and areas with sinks.

The surface is laminated by a special film with an anti-bacterial and anti-mould agent.
